

Rule:

- Max 4 Pagers
- Use Power Point
- Any realistic assumptions are welcome
- Assume all data points are available

There are a total of 100 pizza stores in Chennai and you are the owner of a pizza store in a relatively posh locality. All the 100 stores are managed by the Chennai Head. On Friday, you received a call from him asking about:

- How's your store is performing?
- how your products are performing via online, tele sales, and direct sales channel?
- What are the KPIs you will consider and How the outcome (through a cool visual dashboard) would look like?
